

— LIVE SYSTEM · V3

Underwriting at agent speed.

A tightened system built around the new thesis: Pibit is an underwriting instrument — a calibrated agentic surface that reads submissions, calls the right data, and hands underwriters a decision-ready file. Inter throughout, brand blue anchored, with monospace telemetry as the signature tell.

● System online

V3.0

Download tokens

Six moves that make it feel like Pibit.

Everything in v3 traces back to one idea: the product isn't software, it's an instrument underwriters read. Every component either disappears into the page or reads like a calibrated control.

P · 01

One typeface. Full weight system.

Inter carries everything — display, body, UI. JetBrains Mono handles telemetry, labels, and system state. No serif romance, no display face. The voice is the weight contrast, not the typeface count.

P · 02

Blue is the instrument.

One blue family — #0684F0 primary, #093B67 darkest, #66D7F7 ice. Used sparingly so every occurrence reads as a signal, not decoration.

P · 03

Grain + dashed hairlines.

A 4% film-grain overlay lives on the whole page. Dashed hairlines separate thought. Together they make near-white feel like paper, not a blank canvas.

P · 04

Monospace as the signature.

JetBrains Mono carries running heads, section numbers, and any numeric telemetry. It's how Pibit signals "this came from the system," not a marketing writer.

P · 05

Agent state is visible.

Live pulses, telemetry strips, and the `.btn--agent` variant show the product is running, not static. The site feels like a window into a live console.

P · 06

Chrome earns its rectangle.

2px corners. Rectangles, not pills (except filter chips). No gradient flourishes on surfaces. Every border, shadow, and badge has to do work — otherwise it's removed.

Inter 700 / Inter 400 / Mono 500.

Three registers do everything: display (700), body (400), and telemetry (Mono 500 uppercase). The scale is calibrated to read at arm's length — 60 at the top, 11 at the floor.

DISPLAY • 72

Inter 700 / -0.030em

Underwriting at agent speed.

H1 · 60

Inter 700 / -0.030em

From submission to scored risk in forty- one seconds.

H2 · 48

Inter 700 / -0.030em

The industry's only **CURE™**.

H3 · 36

Inter 700 / -0.020em

Automate intake, triage, and enrichment.

H4 · 28

Inter 600 / -0.020em

Completeness and appetite, built in.

H5 · 22

Inter 600 / -0.020em

ClearCURE™ — submission readiness engine.

LEAD · 20

Inter 400 / -0.012em

Automate intake, triage, and data enrichment from documents and external sources while surfacing risk insights to win the right accounts faster.

BODY · 16

Inter 400 / -0.005em

Pibit validates completeness, aligns submissions with appetite rules, and produces structured records for downstream underwriting. Every submission arrives ready, before underwriters touch the file.

Blue, paper, ink. Nothing else.

The palette is deliberately restricted. One blue family, one paper, one ink, and two signal colors. Anything else is noise.

BRAND BLUE One family, used with intent. Blue Ice is the only highlight color on dark surfaces.

Blue #0684F0
Primary CTA · active link · accent

Blue Deep #0072B7
Hover · display emphasis · logo

Blue Navy #213E7C
Chart · deep quote · band

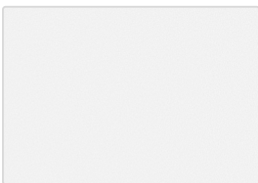

Blue Darkest #093B67
Footer · ink-blue surface

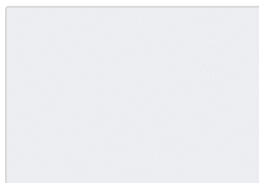

Blue Ice #66D7F7
On-dark highlight · telemetry

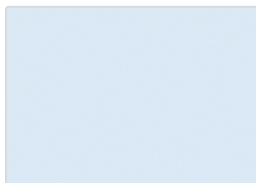

SURFACE Near-white paper with film grain. No warm tones — pure neutral.

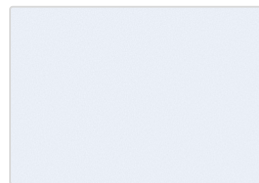

Paper #FAFAFA
Page canvas

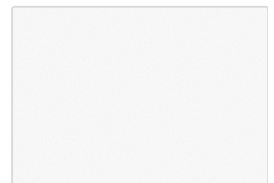

Paper Alt #F4F6F9
Alternate band · card tint

Blue Tint #E2F1FD
Pill · quote wash

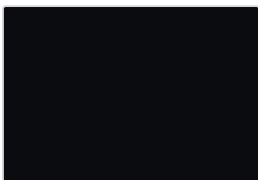

Blue Bg #F2F7FF
Whisper wash · module pill

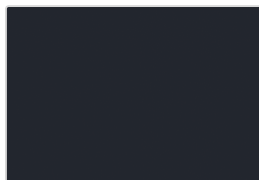

Chalk #FFFFFF
Card surface · hero bg

INK & SIGNAL Foreground ramp plus the two signal colors: green for live-agent, orange for alerts.

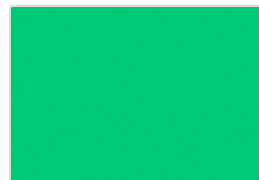

Ink #0B0D10
Primary text · display

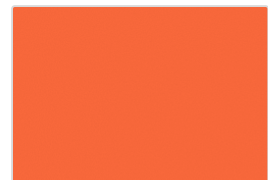

Graphite #242830
Strong body · icon

Pencil #5C6370
Body · meta · caption

Signal #00D17A
Live · agent online · OK

Alert #FF6B3D
Warn · review required

Controls, not decoration.

Buttons with the split arrow-tab, bracketed eyebrows, CURE module pills, tab rows, telemetry strips. Each piece reads as a working control.

BUTTONS • **SPLIT ARROW TAB** The signature move — body + control tab with its own color.

MODULE 01

ClearCURE™ — the readiness engine.

Every submission triaged, validated against your appetite, and landed in PAS as a structured record — ready for an underwriter to decide, not clean up.

Completeness and appetite, built in.

Define what a complete, in-appetite submission means for each line of program, then apply those checks automatically on every file so underwriters only see qualified work.

Decision-ready intake records.

Automatically creates and updates submission records in PAS, workbenches, and Guidewire — with decision memos aligned to your internal taxonomy and ranked for priority.

↗

Built on trust. Proven by results.

Testimonial block with a stark portrait tile and display quote. Stat row underneath, each number drawn as an instrument readout with unit exponent.

"Integrating Pibit's CURE™ improved our submission process and helped our team **move from support work to true underwriting.**"

Michaela Morrison · Chief Operating Officer

METHOD INSURANCE SERVICES · A PRIMARIO ASSURANCE COMPANY

87%

Of submissions cleared with zero manual data entry.

4.6×

More submissions quoted per underwriter, per day.

41^s

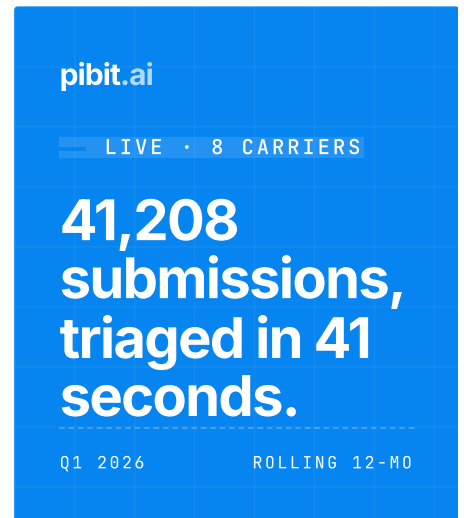

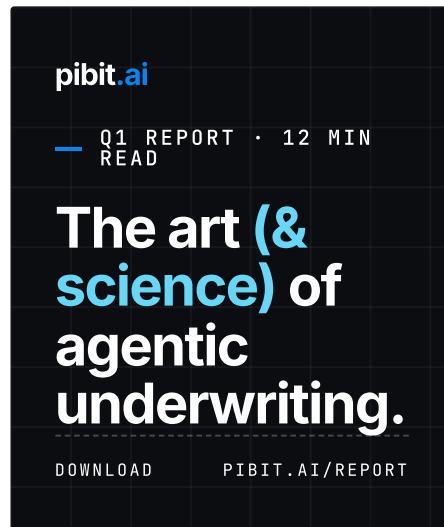

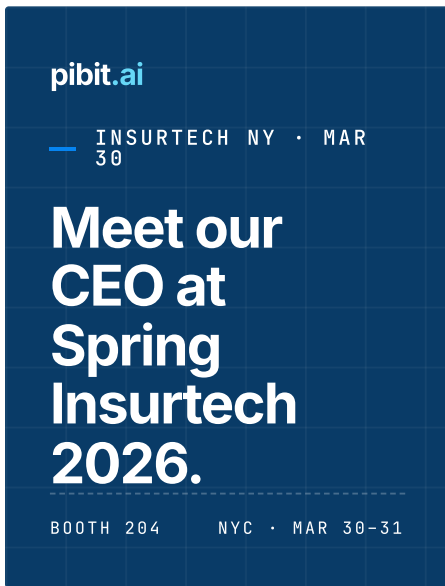

Median time from inbound email to scored risk.

3.2^{pt}

Loss-ratio improvement in year two of deployment.

Same system, smaller canvas.

Three 1:1 posts in the Pibit palette. Same grid underlay, same monospace ticker, same bracketed eyebrow — proving the system travels.

The mark.

The wordmark sits in its own grid — 120px display Inter with a blue .ai. Always on ink, always with calibration metadata.
